

1. **competitive audit:** review 3 diff timers and compare and contrast features you like

<https://www.online-timers.com/pomodoro-timers> -

- adjust the duration of the alarm and the volume (help avoid earrape)
- looks very complicated (would scare people away that just want a simple timer to use)
- customizable, adjust the durations for the timer
- 

<http://www.tomatotimers.com/> -

- ability to loop timer is interesting
- not really a feature but I like the cool diagram of how the pomodoro timer works so new people can learn how to use it
- really cute design makes it extremely appealing
- also has ability to customize the timer but not as detailed as the website above
- you can see the timer in the tab so if you working on another tab you can always glance at it without having to switch tabs

[https://pomodor.app/timer?utm\\_source=zapier.com&utm\\_medium=referral&utm\\_campaign=zapier&utm\\_source=zapier.com&utm\\_medium=referral&utm\\_campaign=zapier](https://pomodor.app/timer?utm_source=zapier.com&utm_medium=referral&utm_campaign=zapier&utm_source=zapier.com&utm_medium=referral&utm_campaign=zapier)

- customizability for timer
- you can see the timer in the tab so if you working on another tab you can always glance at it without having to switch tabs
- has statistics for people that interested in seeing how productive they are
- rewind feature is interesting (incase you accidently start the timer? idk)

<https://tomato-timer.com/>

- keyboard shortcuts to make things faster for those that learn them
- can change volume but by increments of 25% :(
- like the other timers some customizability
- 

[https://kanbanflow.com/?utm\\_source=zapier.com&utm\\_medium=referral&utm\\_campaign=zapier&utm\\_source=zapier.com&utm\\_medium=referral&utm\\_campaign=zapier&utm\\_source=zapier.com&utm\\_medium=referral&utm\\_campaign=zapier](https://kanbanflow.com/?utm_source=zapier.com&utm_medium=referral&utm_campaign=zapier&utm_source=zapier.com&utm_medium=referral&utm_campaign=zapier&utm_source=zapier.com&utm_medium=referral&utm_campaign=zapier)

- track tasks you have to complete and track time spend on each task

<https://pomofocus.io/> -

- can control volume(plays the volume too so you can adjust it to the sound you want more accurately)
- ability to autostart the next round if you do multiple rounds
- can add tasks that you need to do for each task you can apply x amount of pomodoro timers
- states when your timer will end so you can manage your schedule for the day

<https://www.marinaratimer.com/KtGxUG> -

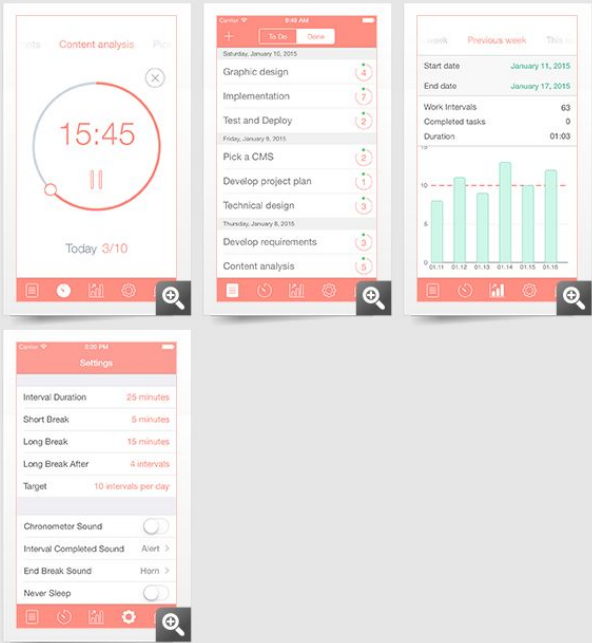

- can change the sound of the alarm lots of options
  - we can have feature to adjust the volume and sound of the alarm
- looking at a bunch of these timers it seems most have options to customize long and short break
- They also have the timer in the tab so it can be easily referenced

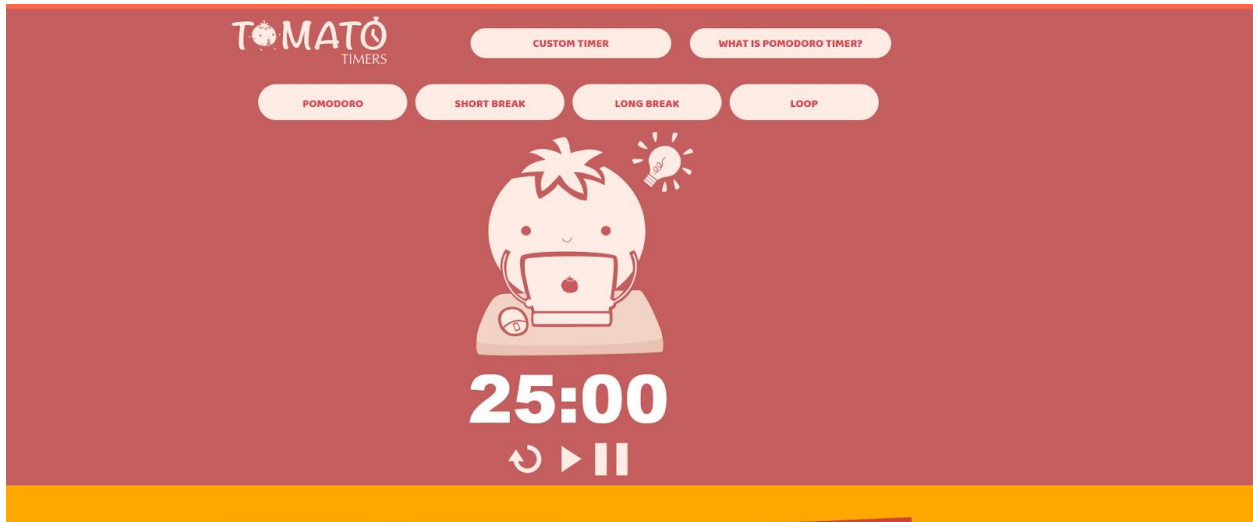

2. **user empathy activity:** come up with how you would use the timer and how someone that is not a student would **use the timer**

- Used to help manage time between tasks
- keep track of tasks done during the day
- todo list for the day
- help motivate someone to be productive (give some sort of incentive?)
- cooking/baking
- workingout

3. **mood boarding:** screenshot 3 different \* aesthetics/web designs \* that you like and would want in the timer

Screenshots - iPhone

themes? different color options for people
